

Document Viewer (Pro 5, 6, 6.5, 7.x VFP, 7.x SQL)

You are just a hotkey away from flexibly viewing or printing any sales order purchase order, or invoice in the system.

Features

- No ACCPAC source code is modified. Runs off the custom menu pad.
- Look up documents with whatever information you are given. If the customer only has their PO Number, you can do a lookup by that and get to their invoice and sales order.
- Enter the Sales Order Number, Invoice Number, PO Number or Customer PO Number. It will automatically search through current and history records.
- If you do an F2 lookup it will prompt for Current or History.
- If you have customized the Pro Series form it will utilize the customized form.
- Preview or print all related documents, regardless of if they exist in the current or history files.

ONLY
\$500
