Process credit card payments seamlessly from the AR cash receipts screen in your ALERE Accounting system with Credit Card Processing from Data Developers Plus!

By utilizing the processing services of Authorize.net you can now process your customer's credit card payment from the ALERE Accounting AR cash receipt screen. This module utilizes the customer data in the ALERE customer record to reduce data entries and mistakes when processing credit card payments. Within seconds the transaction is approved. The ALERE invoice is automatically stamped "Paid", with the authorization code displayed in the lower left text box. Get payment proceeds into your bank account sooner rather than later with the Credit Card Processing module for ALERE Accounting!
