

# THE RIATA™ RF WAREHOUSE MANAGEMENT SYSTEM

## Pallet License Plate Module

The Riata RF Pallet License Plate Module assigns a bar coded "license plate" to a pallet or container of selected inventory. Multiple items and lots can be assigned to one license plate. This license plate is tracked through physical movements in the warehouse. Locations, contents and quantities are updated in the accounting system in real time from a remote wireless hand held device (HHD). Adjusted quantities, new locations, etc. are always up to date in the inventory accounting records.

RIATA RF  
Item: FPG95533767  
Location: **A13-1**  
Lot #: T2339ABC  
Qty: 224 Tubs

### Starting Warehouse Location: A13-1

Pallet is built with these contents:

Item: FPG95533767  
Lot # T2339ABC  
Quantity: 224 Tubs

Riata RF assigns a bar coded "license plate" to identify the pallet location and its contents: Item, Lot # and Quantity.

RIATA RF  
Item: FPG95533767  
Location: **CELL A1**  
Lot #: T2339ABC  
Qty: 224 Tubs

### Move #1: to Warehouse Cell A1

The pallet is moved from A13-1 to Cell A1. Some of the tubs are issued at Cell A1, reducing the pallet quantity. The new location and quantity issued (4 units) is entered into the HHD, inventory accounting records are updated in real time.

RIATA RF  
Item: FPG95533767  
Location: **S03-1**  
Lot #: T2339ABC  
Qty: 200 Tubs

### Move #2: to Warehouse Location S03-1

Pallet contents:

Item: FPG95533767  
Lot # T2339ABC  
Quantity: 200 Tubs

The new location is updated from the HHD, into the inventory accounting records along with Item, Lot # and new Quantity data, in real time.
